

Szyb Maciej has always been associated with water. Its large inflow made it difficult and extended the construction of the shaft to over six years. From 1928, the Castellengo-Abwehr community, the then owner of the Concordia mine, began to use this water for communal purposes by establishing the Waterworks. This water, through a network of steel and cast iron pipelines, supplied towns and workplaces along the Gliwice - Bytom railway line. Thus, for almost 90 years, Maciej Shaft has been a source of excellent quality drinking water.

Szyb Maciej, however, is primarily a complex of historic buildings and structures together with the equipment of the former Concordia Mine. Since 1994, after the end of hard coal mining, being the property of Przedsiębiorstwo Górniczego Demex sp.z o.o. the buildings underwent a transformation, the purpose of which was to adapt the complex to tourism, while preserving and displaying the technical heritage of mining. In the headroom building, where previously there were coal tanks, and later a brand and lamp room - a restaurant was established in an industrial atmosphere, and in the place of the former electrical workshop - a bistro. The way the revitalization was carried out and the high level of conservation works were appreciated, among others, by General Conservator of Monuments.

Post-industrial monuments in Zabrze - Maciej Shaft, Guido Mine and the Queen Louise Open-Air Museum are among the key and most attractive sites on the Industrial Monuments Route.

We cordially invite guests to taste the specialties of our kitchen, as well as to visit and to know the history of the earth and the water taken.
